

The PA25 remote indicators have been designed for direct connection to fire detectors (conventional and analogue), enabling luminous indication outside the area where the detector is installed.

Specifications

Electrical Specifications

| | |
|-------------------------------|----------------|
| Supply Voltage (Analogue) | 5 to 10 VDC |
| Current Consumption | 2 to 79 mA |
| Supply Voltage (Conventional) | 2 to 5 VDC |
| Current Consumption | 6.5 to 61.5 mA |

Mechanical Specifications

| | |
|------------------|-----------------|
| Size (w x h x d) | 80 x 80 x 42 mm |
| Weight | 10 g |
| Box material | A.B.S. |
| Colour | White |

Environmental Specifications

| | |
|---------------------|---------------|
| Protection level | IP20 |
| Working temperature | -10 to +60 °C |
| Storage temperature | -10 to +70 °C |

Ordering Information

PA25/3L Low current remote LED indicator

- Direct two-wire connection to detector
- Large angle of visibility - lit up on four sides
- Low current consumption
- Flashing option
- 2 to 10 VDC power supply
- High luminosity
- Compatible with third party products
- IP20 protection level
- Modern and elegant design
- ABS plastic casing with ruby red polycarbonate spy-hole
- Shock resistant
